

How to Decide: Technician Appointment vs DVM

Decision Tree - It is important to follow guidelines of your state practice act and that the technician is not diagnosing, doing surgery, prognosis, etc.

*Administration of Rabies vaccines and microchips are highly regulated and may be limited to the doctor.
+For these types of services a technician appointment fee should be charged. All other fees stay the same.

Completing the Technician Appointment

- How do I charge for this?
 - 1/3 the cost of a DVM exam (e.g. \$25 technician appointment).
- Documentation of the visit is completed in medical record as if appointment was completed by DVM.

We know every hospital's circumstances are different. We are here to talk through how to incorporate technician appointments into your practice!
